Investment-Linked Fund Performance Report September 2023

General Advice Warning

The information contained in this material is general information and intended for the use of professional advisers, researchers, and trustees. It does not take into account the objectives, financial situation or needs of any person. These factors should be considered before acting on this information.

MCIS receives remuneration such as fees, charges, or premiums for the products. Details of these payments including how they are calculated and when and how they are payable can be found in the relevant sales illustrations, or other disclosure document for each product.

MCIS Life has received on behalf of the funds, soft commissions from our investment fund bankers/brokers, in the form of research materials and investment-related publications which are incidental to the investment management of the funds. This report, among others, incorporates consolidated content for the benefit of MCIS Life's policyholders.

Past performance is not a reliable indicator of future performance.

The information in this presentation should not be considered a personal recommendation on any of the securities or stocks mentioned.

EXECUTIVE SUMMARY

For the month of September, the FBMKLCI Index closed lower by 1.9% MoM to 1,424.17 points. This has widened the YTD loss to -4.8%. Investors were cautious due to global inflation concerns, fueled by elevated crude oil prices and the looming the US government shutdown. The average daily trading value in the month rose 11.6% MoM and 24.7% YoY to RM2.2bil. Meanwhile, average daily trading volume in rose 11.8% MoM and 43.3% YoY to 3.5bil units.

Malaysia Government Securities (“MGS”) yields spiked higher across the curve, in line with the increasing global bond yields. Brent crude oil prices jumped to USD95.31/barrel as at end-Sep’23 (end-Aug: USD86.86/barrel), driven by the rising global demand and OPEC+ production cuts. Meanwhile, ringgit continued to weaken against the dollar to RM4.6950/USD (end-Aug’32: RM4.6385/USD).

On the local economic data, inflation was seen unchanged at +2.0% YoY in Aug’23. Malaysia’s exports and imports declined further by -18.6% YoY and -21.2% YoY respectively in Aug’23.

For the equity market, after series of interest rate hikes by the US Federal Reserve to fight against inflation in the 1H2023, the economy has proven to be more resilient than anticipated. We are more optimistic about the outlook for economic expansion this year. Locally, post OPR rate hike to 3.00% in May 2023, we expect BNM to maintain the OPR unchanged for the remaining of 2023. The OPR rate hike will be negatively impact to the local equity market for short term period. However, for longer term, we expect there will be recovery in the 2H2023 when the inflation started to inch lower. Historical analysis is suggesting that lower interest rates due to lower inflation will be positive for the equity market.

Meanwhile for fixed income, after a series of recent OPR hikes to pre-pandemic level, BNM is anticipated to keep its monetary policy unchanged in 2H2023, aiming to balance the economic growth and inflationary pressure in the country. The external risk factors such as Russia-Ukraine geopolitical tension and the fluctuation in crude oil prices will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.

Based on the table below, on a monthly basis, most of the funds managed to outperformed the respective benchmarks, except for Global Yakin Fund.

Policyholders are encouraged to focus on regular premiums given the current risk and volatile period of the economic and market condition. Risk-averse investors should focus on income funds due to its less volatile as compared to equity-related funds.

AsiaPac Fund Monthly Report (September 2023)

Investment Objective

To achieve a steady income stream with potential growth in the Asia Pacific Region over the medium to long term. The aim of the Fund is to outperform the S&P Ethical Pan Asia Select Dividend Opportunities Index over periods of five or more years.

Investment Strategy

To invest in Principal S&P Asia Pacific Ethical Dividend Exchange Traded Fund (ETF), managed by Principal Asset Management (S) Pte Ltd where the ETF is listed on the Singapore Stock Exchange.

The ETF focuses on the top 40 ethical and high-yielding stocks in the Asia Pacific Region excluding India, Taiwan, Japan, New Zealand, and the Philippines. The fund provides country diversification across the industry that is traded in US Dollars.

Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund is to be reviewed on a regular basis and adjusted to be commensurate with the Investment Team's view on the relative attractiveness of each asset class.

The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The target market is for investors who are seeking regional exposure from investment and at the same time, seeking medium to long-term capital appreciation with moderate market risk.

Fund Performance

For the month ended September 2023, the fund had outperformed the benchmark by 205bps MoM (month-on-month). The fund had outperformed the benchmark since its inception.

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12-months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

* Index is S&P Ethical Pan Asia Select Dividend Opportunities sourced from Bloomberg.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

Balanced Fund Monthly Report (September 2023)

Investment Objective

The objective of the Balanced Fund is to provide security and income, while maintaining and potentially increasing the value of capital over the medium to long term, through exposure across a range of asset classes. The Fund aims to outperform the performance benchmark over periods of three or more years.

Investment Strategy

To invest in Malaysian equities and fixed income securities, including government bonds and corporate debt securities. The asset allocation is reviewed on a regular basis and is adjusted commensurate with our view on the relative attractiveness of each asset class.

Risks

The Fund is considered medium risk given the mixed exposure of equity securities, fixed income, and cash. The following factors can potentially affect the value of the Fund, consumer sentiment, financial performance of the underlying companies, industry and economic development, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades of defaults can affect the value of fixed income securities.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended September 2023, the fund had outperformed the benchmark by 126bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

* The benchmark index is a composite of 50% FBMKLCI Index and 50% of Markit iBoxx ALBI Malaysia TR Index (Since June '16). Prior to that, the index used was HSBC Malaysia All Bond Index for the fixed income portion. Benchmark return is calculated on re-based basis. The source is from the subscription of Markit Indices.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

Dividend Fund

Monthly Report (September 2023)

Investment Objective

To achieve a steady income stream with potential for capital growth over the medium to long term by focusing mostly on high dividend-yielding stocks and money market instruments. The aim of the Fund is to outperform the FBMKLCI Index over periods of five or more years.

Investment Strategy

To invest in a broad selection of companies listed on the Malaysian Stock Exchange. Using a relative value methodology, the fund focuses on undervalued stocks relative to fundamental value, with the aim of achieving an income stream, together with some degree of long-term capital gains.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended September 2023, the fund had outperformed the benchmark by 153bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

Equity Fund

Monthly Report (September 2023)

Investment Objective

The objective of the Equity Fund is to achieve capital growth over the medium to long term by focusing on high-quality equities listed on the FBMKLCI Index. The aim of the Equity Fund is to outperform the Index over periods of five or more years.

Investment Strategy

To invest in a broad selection of companies listed on the Malaysian Stock Exchange. Using a relative value methodology, the fund focuses on the stocks whose shares appear undervalued relative to fundamental value, with the aim of achieving long-term growth in capital value.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended September 2023, the fund had outperformed the benchmark by 193bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

Global Yakin Fund

Monthly Report (September 2023)

Investment Objective

The fund aims for capital appreciation in the long term by investing in an international portfolio of Shariah-compliant equities and equity-related securities of companies with good growth potential. The Fund is not a Shariah-compliant product.

Investment Strategy

The Fund is to feed into abrdn Islamic World Equity Fund ("AIWEF") (formerly known as Aberdeen Standard Islamic World Equity Fund) which is managed by abrdn Islamic Malaysia Sdn Bhd (formerly known as Aberdeen Standard Investments (Malaysia) Sdn Bhd). The Fund invests in shariah approved securities across the globe.

The Fund seeks to achieve its objective by investing in an international portfolio of Shariah-compliant equities and equity-related securities of companies with good growth potential. The countries that the Fund will invest in will include, but not be limited to Canada, the United States of America, the United Kingdom, France, Germany, Italy, Netherlands, Sweden, Switzerland, Japan, Australia, China, Hong Kong, Korea, Singapore, Taiwan, Brazil, and Mexico.

Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund is to be reviewed on a regular basis and adjusted to be commensurate with the Investment Team's view on the relative attractiveness of each asset class.

The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon and who are willing to accept a high level of risk.

Fund Performance

For the month ended September 2023, the fund had underperformed the benchmark by 39bps MoM (month-on-month). The underperformance was mainly due to the underperforming of the underlying securities compared to the benchmark index.

Income Fund

Monthly Report (September 2023)

Investment Objective

The objective of the Income Fund is to provide investors with the security of income by investing in a mix of fixed income and fixed deposit securities. The aim of the Fund is to outperform the Markit iBoxx ALBI Malaysia TR Index.

Investment Strategy

To invest in underlying asset classes as per the Asset Allocation Ranges. The asset allocation is reviewed on a regular basis and is adjusted commensurate with our view on the relative attractiveness of each asset class. The Fund invests in cash and fixed income securities including government bonds and corporate debt securities.

Risks

The Fund is considered lower risk given the exposure to cash and fixed income securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades or defaults can affect the value of fixed income securities.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended September 2023, the fund had outperformed the benchmark by 94bps MoM (month-on-month). The outperformance was due to the outperforming of the fixed income securities compared to the benchmark index.

Jati Fund

Monthly Report (September 2023)

Investment Objective

The Jati Fund is invested in accordance with Shariah principles in Shariah sanctioned equities, money market instruments, and fixed income investments. The aim is to provide security and income, while maintaining and potentially increasing the value of capital over the medium to long term. The Fund is not a Shariah-compliant product.

Investment Strategy

To invest in a broad selection of Shariah approved securities listed on the Malaysian Stock Exchange. Using a relative value methodology, it looks to buy stocks whose shares appear undervalued relative to fundamental value, with the aim of achieving an income stream, together with some degree of long-term capital gains.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended September 2023, the fund had outperformed the benchmark by 54bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

Titan Fund

Monthly Report (September 2023)

Investment Objective

The Fund invests in MyETF Dow Jones U.S. Titans 50 ("MyETF-US50") which aims to provide investment results that closely correspond to the performance of the Dow Jones Islamic Market U.S. Titans 50 Index. The Fund is not a Shariah-compliant product.

Investment Strategy

MyETFDJ50 is managed by i-VCAP Management Sdn Bhd and it invests in 50 largest Shariah-compliant companies listed in the U.S. MyETFDJ50 is a passively managed fund.

Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund is to be reviewed on a regular basis and adjusted to be commensurate with the Investment Team's view on the relative attractiveness of each asset class.

The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The Fund is suitable for investors who are seeking diversification and investment opportunities in Shariah-compliant equities in the U.S. market and seeking liquid financial instruments with an index tracking feature.

Fund Performance

For the month ended September 2023, the fund had outperformed the benchmark by 294bps MoM (month-on-month).

Equity Market Review and Outlook

Market Review

For the month of September, the FBMKLCI Index closed lower by 1.9% MoM to 1,424.17 points. This has widened the YTD loss to -4.8%. Investors were cautious due to global inflation concerns, fueled by elevated crude oil prices and the looming the US government shutdown. The average daily trading value in the month rose 11.6% MoM and 24.7% YoY to RM2.2bil. Meanwhile, average daily trading volume in rose 11.8% MoM and 43.3% YoY to 3.5bil units.

Foreign investors stayed net buyers in September for the third month in a row after previously net selling for ten consecutive months. Local institutional investors turned net sellers during September with a net sell flow of RM 545.1mil compared to a net buy flow of RM 432.1mil in August. Local retail investors saw net sell flow decline 78% MoM to RM 95.1mil in September compared to a net sell flow of RM 431.7mil in August.

Meanwhile, global equity markets declined further in September. Investors were bracing for the impact of 'higher for longer' theme as the Federal Reserve signaling that interest rates will likely to stay higher for longer time. DJIA Index closed lower by 3.5% MoM and the broader S&P 500 index closed lower by 4.9% MoM. Eurozone shares also posted loss as the European central bank also maintained their hawkish rhetoric and weak economic data which coming out of Germany. Bloomberg European 500 index closed -2.1% MoM. In Asia, the performances were negative as concerns over the Chinese economy and fears over global economic growth weakened investor sentiment. MSCI Asia APEX 50 ex-Japan closed -3.9% MoM during the month.

Market Outlook & Strategy

Traditionally, FBMKLCI Index's performance tends to be positive in October, with average 1.2%/0.6% MoM returns over the past 10 years/45 years. We expect the market to be supportive by its attractive valuations at current levels of 1.27x as it is now below its 13-year historical average of P/B (1.90x) and 15.5x PER compared to the 13-year historical average of PER (17.2x).

Technically, the FBMKLCI Index bullish MACD crossover happened in July failed to sustain and pulling back the index in September, closed at 1,424 level. This bearish momentum has created a strong resistance at 1,452 level, the Head and Shoulders bearish reversal pattern. Staying below this level indicates bearish momentum and might test psychological level of 1,400. We expect the correction will continue in the near term until there is bullish reversal pattern near the support level. After the psychological level, next support level is marked at 1,317 level, while next support level is seen at 1,500 level.

After series of interest rate hikes by the US Federal Reserve to fight against inflation in the 1H2023, the economy has proven to be more resilient than anticipated. We are more optimistic about the outlook for economic expansion this year. Locally, post OPR rate hike to 3.00% in May 2023, we expect BNM to maintain the OPR unchanged for the remaining of 2023. The OPR rate hike will be negatively impact to the local equity market for short term period. However, for longer term, we expect there will be recovery in the 2H2023 when the inflation started to inch lower. Historical analysis is suggesting that lower interest rates due to lower inflation will be positive for the equity market.

Fixed Income Review and Outlook

Market Review

Malaysia Government Securities (“MGS”) yields spiked higher across the curve, in line with the increasing global bond yields. Brent crude oil prices jumped to USD95.31/barrel as at end-Sep’23 (end-Aug: USD86.86/barrel), driven by the rising global demand and OPEC+ production cuts. Meanwhile, ringgit continued to weaken against the dollar to RM4.6950/USD (end-Aug’32: RM4.6385/USD).

On the local economic data, inflation was seen unchanged at +2.0% YoY in Aug’23 (Jul’23: +2.0% YoY). Food and Non-Alcoholic Beverages (FNAB) prices continued to moderate to +4.1% YoY (Jul’23: +4.4% YoY), in line with the easing of global food price inflation. Transport inflation was muted, mainly supported by the Government subsidies on the RON95 and diesel fuel. Malaysia Exports and Imports declined further by -18.6% YoY and -21.2% YoY respectively in Aug’23 (Jul’23:-13.0% and -16.1% YoY respectively). All major Exports segments declined in Aug’23, including Manufacturing, Agriculture and Mining. Contraction in Imports was driven mainly by Re-Exports, Intermediate Goods and Consumption Goods while Capital Goods saw a rebound. In summary, trade surplus remained largely unchanged at +RM17.3b in Aug’23 (Jul’23: +RM17.1b).

BNM’s international reserve declined to USD110.1b as at end-Sep’23 (end-Aug’23: USD111.5b). The reserve is sufficient to finance 5.1 months of retained imports and is 1.0 times of short-term external debts.

The auctions unveiled in Sep’23 is as follow;

Government Auctions		Auction Amount + PP	Bid-cover	Avg Yield
Issue	Issue Date	(RM million)	(times)	(%)
3-yr Reopening of MGII 09/26 4.070%	13/9/2023	4,500.00	2.17	3.54
30-yr Reopening of MGS (Mat on 03/53)	22/9/2023	5,000.00	1.90	4.45
5-yr Reopening of MGII (Mat on 07/28)	29/9/2023	5,000.00	1.95	3.81

Chart 1: MGS Yield Curve

Source: BPAM

Chart 2: US Treasury Yield Curve

Source: Bloomberg

US 10-year Treasury yield spiked up to 4.67% before easing back to 4.57% as at end-Sep’23 (end-Aug’23: 4.34%), taking cue from the worries of US Government shutdown.

Market Outlook & Strategy

After a series of recent OPR hikes to pre-pandemic level, BNM is anticipated to keep its monetary policy unchanged in 2H2023, aiming to balance the economic growth and inflationary pressure in the country. The external risk factors such as Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.
