# Investment-Linked Fund Performance Report February 2024

## **General Advice Warning**

The information contained in this material is general information and intended for the use of professional advisers, researchers, and trustees. It does not take into account the objectives, financial situation or needs of any person. These factors should be considered before acting on this information.

MCIS receives remuneration such as fees, charges, or premiums for the products. Details of these payments including how they are calculated and when and how they are payable can be found in the relevant sales illustrations, or other disclosure document for each product.

MCIS Life has received on behalf of the funds, soft commissions from our investment fund bankers/brokers, in the form of research materials and investment-related publications which are incidental to the investment management of the funds. This report, among others, incorporates consolidated content for the benefit of MCIS Life's policyholders.

## **Past performance is not a reliable indicator of future performance**

The information in this presentation should not be considered a personal recommendation on any of the securities or stocks mentioned.

## EXECUTIVE SUMMARY

For the month of February, the FBMKLCI Index closed higher by 2.5% MoM to 1,551.44 points, recording fifth consecutive month of gain. The average daily trading value in the month fell 15.4% MoM but rose 11.3% YoY to RM2.7bil. Meanwhile, average daily trading volume fell 32.5% MoM and 8.5% YoY to 3.5bil units.

Malaysia Government Securities (“MGS”) yields were moving higher, driven by the increasing US Treasury yields. Brent crude oil prices were closed slightly higher at USD83.62/barrel (end-Jan’24: USD81.71barrel), due to the heightened tension in the Middle East. Meanwhile, ringgit weakened further against the dollar to RM4.7428/USD as at end-Feb’24 (end-Jan’24: RM4.7330/USD).

On the local economic data, Malaysia’s GDP growth eased slightly to +3.0% YoY in 4Q’23 (3Q’23: +3.3% YoY). The GDP growth was supported by Services Sector, Construction Sector and Mining Sector.

For the equity market, we expect a positive recovery in the year 2024, especially for the local market, supported by improved corporate earnings and government transformation plans that should support the domestic economy. We expect BNM to maintain the OPR unchanged at least for the first half of 2024, due to easing inflation expectation. On the global economic review, the resilience of the US economy may lead to a soft landing, rather than recession. The tail-end of global monetary policy tightening will be positive for foreign investors to make their way back to the local stock market.

Meanwhile for fixed income, after series of OPR hikes to pre-pandemic level, BNM is anticipated to keep its monetary policy unchanged in 1H2024, aiming to balance the economic growth and inflationary pressure in the country. The external risk factors such as Israel-Hamas war and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.

Based on the table below, on a monthly basis, Global Yakin Fund had outperformed the benchmark index.

Policyholders are encouraged to focus on regular premiums given the current risk and volatile period of the economic and market condition. Risk-averse investors should focus on income funds due to its less volatile as compared to equity-related funds.

Performance Table: Funds vs Benchmarks

	Asiapac Fund		Balanced Fund		Dividend Fund		Equity Fund		Global Yakin Fund		Income Fund		Jati Fund		Titan Fund

# AsiaPac Fund

## Monthly Report (February 2024)

### Investment Objective

To achieve a steady income stream with potential growth in the Asia Pacific Region over the medium to long term. The aim of the Fund is to outperform the S&P Ethical Pan Asia Select Dividend Opportunities Index over periods of five or more years.

### Investment Strategy

To invest in Principal S&P Asia Pacific Ethical Dividend Exchange Traded Fund (ETF), managed by Principal Asset Management (S) Pte Ltd where the ETF is listed on the Singapore Stock Exchange.

The ETF focuses on the top 40 ethical and high-yielding stocks in the Asia Pacific Region excluding India, Taiwan, Japan, New Zealand, and the Philippines. The fund provides country diversification across the industry that is traded in US Dollars.

### Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund is to be reviewed on a regular basis and adjusted to be commensurate with the Investment Team's view on the relative attractiveness of each asset class.

The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The target market is for investors who are seeking regional exposure from investment and at the same time, seeking medium to long-term capital appreciation with moderate market risk.

### Fund Performance

For the month ended February 2024, the fund had underperformed the benchmark by 285bps MoM (month-on-month). The underperformance was mainly due to the underperformance of the underlying asset. However, the fund has outperformed the benchmark since its inception.

**Notice: Past performance is not indicative of future performance, and the performance of the Fund is not guaranteed.**

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12-months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

\* Index is S&P Ethical Pan Asia Select Dividend Opportunities sourced from Bloomberg.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

# Balanced Fund Monthly Report (February 2024)

## Investment Objective

The objective of the Balanced Fund is to provide security and income, while maintaining and potentially increasing the value of capital over the medium to long term, through exposure across a range of asset classes. The Fund aims to outperform the performance benchmark over periods of three or more years.

## Investment Strategy

To invest in Malaysian equities and fixed income securities, including government bonds and corporate debt securities. The asset allocation is reviewed on a regular basis and is adjusted commensurate with our view on the relative attractiveness of each asset class.

## Risks

The Fund is considered medium risk given the mixed exposure of equity securities, fixed income, and cash. The following factors can potentially affect the value of the Fund, consumer sentiment, financial performance of the underlying companies, industry and economic development, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades of defaults can affect the value of fixed income securities.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

## Fund Performance

For the month ended February 2024, the fund had underperformed the benchmark by 11bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

**Notice: Past performance is not indicative of future performance, and the performance of the Fund is not guaranteed.**

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12-months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

\* The benchmark index is a composite of 50% FBMKLCI Index and 50% of Markit iBoxx ALBI Malaysia TR Index (Since June '16). Prior to that, the index used was HSBC Malaysia All Bond Index for the fixed income portion. Benchmark return is calculated on re-based basis. The source is from the subscription of Markit Indices.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

## Dividend Fund Monthly Report (February 2024)

### Investment Objective

To achieve a steady income stream with potential for capital growth over the medium to long term by focusing mostly on high dividend-yielding stocks and money market instruments. The aim of the Fund is to outperform the FBMKLCI Index over periods of five or more years.

### Investment Strategy

To invest in a broad selection of companies listed on the Malaysian Stock Exchange. Using a relative value methodology, the fund focuses on undervalued stocks relative to fundamental value, with the aim of achieving an income stream, together with some degree of long-term capital gains.

### Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

### Fund Performance

For the month ended February 2024, the fund had underperformed the benchmark by 89bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

# Global Yakin Fund

## Monthly Report (February 2024)

### Investment Objective

The fund aims for capital appreciation in the long term by investing in an international portfolio of Shariah-compliant equities and equity-related securities of companies with good growth potential. The Fund is not a Shariah-compliant product.

### Investment Strategy

The Fund is to feed into abrdn Islamic World Equity Fund ("AIWEF") (formerly known as Aberdeen Standard Islamic World Equity Fund) which is managed by abrdn Islamic Malaysia Sdn Bhd (formerly known as Aberdeen Standard Investments (Malaysia) Sdn Bhd). The Fund invests in shariah approved securities across the globe.

The Fund seeks to achieve its objective by investing in an international portfolio of Shariah-compliant equities and equity-related securities of companies with good growth potential. The countries that the Fund will invest in will include, but not be limited to Canada, the United States of America, the United Kingdom, France, Germany, Italy, Netherlands, Sweden, Switzerland, Japan, Australia, China, Hong Kong, Korea, Singapore, Taiwan, Brazil, and Mexico.

### Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund is to be reviewed on a regular basis and adjusted to be commensurate with the Investment Team's view on the relative attractiveness of each asset class.

The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon and who are willing to accept a high level of risk.

### Fund Performance

For the month ended February 2024, the fund had outperformed the benchmark by 49bps MoM (month-on-month). The fund also had outperformed the benchmark since its inception.

# Income Fund

## Monthly Report (February 2024)

### Investment Objective

The objective of the Income Fund is to provide investors with the security of income by investing in a mix of fixed income and fixed deposit securities. The aim of the Fund is to outperform the Markit iBoxx ALBI Malaysia TR Index.

### Investment Strategy

To invest in underlying asset classes as per the Asset Allocation Ranges. The asset allocation is reviewed on a regular basis and is adjusted commensurate with our view on the relative attractiveness of each asset class. The Fund invests in cash and fixed income securities including government bonds and corporate debt securities.

### Risks

The Fund is considered lower risk given the exposure to cash and fixed income securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades or defaults can affect the value of fixed income securities.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

### Fund Performance

For the month ended February 2024, the fund had outperformed the benchmark by 23bps MoM (month-on-month). The outperformance was due to the outperforming of the fixed income securities compared to the benchmark index.

# Jati Fund

## Monthly Report (February 2024)

### Investment Objective

The Jati Fund is invested in accordance with Shariah principles in Shariah sanctioned equities, money market instruments, and fixed income investments. The aim is to provide security and income, while maintaining and potentially increasing the value of capital over the medium to long term. The Fund is not a Shariah-compliant product.

### Investment Strategy

To invest in a broad selection of Shariah approved securities listed on the Malaysian Stock Exchange. Using a relative value methodology, it looks to buy stocks whose shares appear undervalued relative to fundamental value, with the aim of achieving an income stream, together with some degree of long-term capital gains.

### Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

### Fund Performance

For the month ended February 2024, the fund had underperformed the benchmark by 8bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

## Monthly Report (February 2024)

### Investment Objective

The Fund invests in MyETF Dow Jones U.S. Titans 50 (“MyETF-US50”) which aims to provide investment results that closely correspond to the performance of the Dow Jones Islamic Market U.S. Titans 50 Index. The Fund is not a Shariah-compliant product.

### Investment Strategy

MyETFDJ50 is managed by i-VCAP Management Sdn Bhd and it invests in 50 largest Shariah-compliant companies listed in the U.S. MyETFDJ50 is a passively managed fund.

### Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund is to be reviewed on a regular basis and adjusted to be commensurate with the Investment Team’s view on the relative attractiveness of each asset class.

The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The Fund is suitable for investors who are seeking diversification and investment opportunities in Shariah-compliant equities in the U.S. market and seeking liquid financial instruments with an index tracking feature.

### Fund Performance

For the month ended February 2024, the fund had underperformed the benchmark by 537bps MoM (month-on-month). The underperformance was mainly due to the underperformance of the underlying asset.

Titan Fund Performance Since Inception

# Equity Market Review and Outlook

## Market Review

For the month of February, the FBMKLCI Index closed higher by 2.5% MoM to 1,551.44 points, recording fifth consecutive month of gain. The average daily trading value in the month fell 15.4% MoM but rose 11.3% YoY to RM2.7bil. Meanwhile, average daily trading volume fell 32.5% MoM and 8.5% YoY to 3.5bil units.

Foreign investors stayed as net buyers for the fourth consecutive month in February '24 with net buy flows of RM1.3bil, which was 94.9% higher than the buy flow of RM0.7bil in January '24. Foreign investors' net buy flow further reduced cumulative net foreign outflow since 2010 to RM32.4bil. Local institutions recorded a net sell of RM721.4mil compared to a net buy flow of RM189.9mil in January '24. Local retail investors recorded a net sell of RM354.4mil compared to a net sell flow of RM663.0mil in January '24. This also marked the eighth consecutive month where local retail investors were net sellers.

Meanwhile, global equity markets continued their positive momentum in February '24, supported by better-than-expected 4Q corporate earnings and positive data release confirming U.S. economy on soft-landing. In the U.S., Dow Jones Industrial Index closed higher by 2.2% MoM and the broader S&P 500 index closed higher by 5.2% MoM. With the spillover effect, Eurozone shares also posted a gain with Bloomberg European 500 index closed 1.3% MoM higher. In Asia, the performances were mostly positive led by China market rally with MSCI Asia APEX 50 ex-Japan closed 6.0% MoM during the month.

## Market Outlook & Strategy

Traditionally, FBMKLCI Index's performance was negative in March, with an average of -0.8% for both MoM returns over the past 10 years and 45 years. We expect the market to be supportive by its attractive valuations at current levels of 1.36x as it is now below its 13-year historical average of P/B (1.88x) and 15.3x PER compared to the 13-year historical average of PER (17.1x).

Technically, the FBMKLCI Index has been rebounding higher since it broke the 22-months downtrend line from the March 2022 highs. It is currently trading above its 20-day, 50-day, and 200-day simple moving averages (SMA), implying an ongoing positive sentiment. The immediate support level is seen at the resistance-turned-support of 1,500 psychological mark, followed by 1,465. On the upside, we are eyeing the 1,530 and 1,570 resistances. Meanwhile, the longer-term resistance is set at the 1,600-round figure.

We expect a positive recovery in 2024, especially for the local market, supported by improved corporate earnings and government transformation plans that should support the domestic economy. We expect BNM to maintain the OPR unchanged at least for the first half of 2024, due to easing inflation expectation. On the global economic review, the resilience of the US economy may lead to a soft landing, rather than recession. The tail-end of global monetary policy tightening will be positive for foreign investors to make their way back to the local stock market.

# Fixed Income Review and Outlook

## Market Review

Malaysia Government Securities (“MGS”) yields were moving higher, driven by the increasing US Treasury yields. Brent crude oil prices were closed slightly higher at USD83.62/barrel (end-Jan’24: USD81.71barrel), due to the heightened tension in the Middle East. Meanwhile, ringgit weakened further against the dollar to RM4.7428/USD as at end-Feb’24 (end-Jan’24: RM4.7330/USD).

On the local economic data, Malaysia’s GDP growth eased slightly to +3.0% YoY in 4Q’23 (3Q’23: +3.3% YoY). The GDP growth was supported by Services Sector, Construction Sector and Mining Sector. Inflation in Malaysia was seen unchanged at +1.5% YoY in Jan’24, but it is expected to rise in 2024 taking cue from the Sales & Service Tax hike (6% to 8% in Mar’24), excise duty hike for sweetened drinks (RM0.40/l to RM0.50/l in Jan’24), water tariff hike (+RM0.22/m3 in Feb’24) and electricity tariff hike (+RM12 to +RM32 depending on usage). Malaysia Exports saw strong recovery, coming at +8.7% YoY in Jan’24 (Dec’23: -10.1% YoY) while Imports accelerated to +18.8% YoY in Jan’24 (Dec’23: +2.9% YoY). The recovery in Exports was mainly attributed to the rebound in Manufacturing Exports and Agriculture Exports. Imports experienced double digits growth in all major components, including Consumption Goods, Capital Goods, and Intermediate Imports. In summary, trade surplus tightened slightly to +MYR10.1bil (Dec’23: +RM11.7bil). BNM’s international reserve remained largely unchanged at USD115.4bil as at mid-Feb’24 (mid-Jan’24: USD115.1bil). The reserve is sufficient to finance 5.5 months of retained imports and is 1.0 time of short-term external debts.

The auctions unveiled in Feb’24 is as follow;

Government Auctions		Auction Amount + PP	Bid-cover	Avg Yield
Issue	Issue Date	(RM million)	(times)	(%)
7-yr Reopening of MGS 04/31 2.632%	6/2/2024	5,000.00	2.16	3.78
20-yr Reopening of MGII 08/43 4.291%	15/2/2024	5,000.00	3.04	4.16
3-yr Reopening of MGS 05/27 3.502%	22/2/2024	5,000.00	1.70	3.59

Chart 1: MGS Yield Curve

Source: BPAM

Chart 2: US Treasury Yield Curve

Source: Bloomberg

US 10-year Treasury yield were surging higher to 4.25% as at end-Feb’24 (end-Jan’23: 3.91%), reflecting the increasing possibility of delaying the US Fed rate cuts.

## Market Outlook & Strategy

After a series of recent OPR hikes to pre-pandemic level, BNM is anticipated to keep its monetary policy unchanged in 1H2024, aiming to balance the economic growth and inflationary pressure in the country. The external risk factors such as Israel-Hamas war and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.
