Investment-Linked Fund Performance Report October 2025

General Advice Warning

The information contained in this material is general information and intended for the use of professional advisers, researchers, and trustees. It does not take into account the objectives, financial situation or needs of any person. These factors should be considered before acting on this information.

MCIS receives remuneration such as fees, charges, or premiums for the products. Details of these payments including how they are calculated and when and how they are payable can be found in the relevant sales illustrations, or other disclosure document for each product.

MCIS Life has received on behalf of the funds, soft commissions from our investment fund bankers/brokers, in the form of research materials and investment-related publications which are incidental to the investment management of the funds. This report, among others, incorporates consolidated content for the benefit of MCIS Life's policyholders.

Past performance is not a reliable indicator of future performance

The information in this presentation should not be considered a personal recommendation on any of the securities or stocks mentioned.

EXECUTIVE SUMMARY

Malaysian equity market ended the month of October slightly unchanged with the FBMKLCI Index closed at 1,609.15 points (-0.2% MoM and -2.0% YTD). This was due to the foreign selling of local equities market despite the Fed rate cut. The average daily trading value on Bursa Malaysia rose 8.1% MoM to RM2.9bil. Meanwhile, the average daily trading volume rose 19.0% MoM to 3.6bil units.

Malaysia Government Securities (“MGS”) yields ended higher across all tenures, attributed to the strong 3Q2025 GDP growth of +5.2% YoY as well as the positive outcome from the US-Malaysia trade deal. Brent crude oil prices declined to USD65.07/barrel as at end-Oct'25 (end-Sep'25: USD67.02/barrel). Meanwhile, ringgit strengthened against dollar to RM4.189/USD in Oct'25 (Sep'25: RM4.207/USD).

On the local economic data, inflation increased to +1.5% YoY in Sep'25 (Aug'25: +1.3% YoY). Meanwhile, Malaysia Exports grew by +12.2% YoY in Sep'25 (Aug'25: +1.9% YoY), reflecting the volatile external trade data due to US Reciprocal Tariffs.

Moving forward, the Malaysian equity market is poised for positive growth for the remaining months in the year 2025, supported by domestic demand, strong economic fundamentals, and targeted policy reforms. However, risks from slower global growth, trade policy uncertainties, and continued foreign fund outflows are expected to weigh on the local market outlook. With the expectation of higher volatility, we are cautiously optimistic about the outlook for the local equity market.

For fixed income, in Malaysia, BNM is anticipated to maintain the monetary policy in 4Q2025, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption, Middle East conflict and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.

Based on the table below, on monthly basis, all the local exposure funds outperformed their benchmark indices. Meanwhile, for global exposure funds, MCIS Life Emerging Asia Fund outperformed its benchmark.

Policyholders are encouraged to focus on regular premiums given the current risk and volatile period of the economic and market condition. Risk-averse investors should focus on income funds due to its less volatile as compared to equity-related funds.

MCIS Life Balanced Fund

Monthly Report (October 2025)

Investment Objective

To achieve steady stream of income and capital appreciation over the long term (5 to 10 years of period) by investing in a mixture of local fixed income securities and local equities.

Investment Strategy

The Fund invests primarily in local fixed income securities (MYR assets), including government bonds and corporate debt securities, and local equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides fixed income securities and equities, the Fund would also invest in Collective Investment Scheme ("CIS") and money market instruments.

Risks

The Fund is considered medium risk given the mixed exposure of equity securities, fixed income, and cash. The following factors can potentially affect the value of the Fund, consumer sentiment, financial performance of the underlying companies, industry and economic development, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades of defaults can affect the value of fixed income securities.

The target market is conservative investors who want insurance protection with an element of investment exposure in both local equity and bond markets.

Fund Performance

For the month ended October 2025, the fund outperformed the benchmark by 35bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

Notice: Past performance is not indicative of future performance, and the performance of the Fund is not guaranteed.

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12-months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

* The benchmark index is a composite of 50% FBMKLCI Index and 50% of Markit iBoxx ALBI Malaysia TR Index (Since June '16). Prior to that, the index used was HSBC Malaysia All Bond Index for the fixed income portion. Benchmark return is calculated on re-based basis. The source is from the subscription of Markit Indices.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Equity Fund

Monthly Report (October 2025)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local equities.

Investment Strategy

The Fund invests in broad selection of equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market.

Fund Performance

For the month ended October 2025, the fund outperformed the benchmark by 42bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

MCIS Life Income Fund

Monthly Report (October 2025)

Investment Objective

To achieve a steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in local fixed income securities.

Investment Strategy

The Fund invests primarily in local fixed income securities (MYR assets), including government bonds and corporate debt securities. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides fixed income securities, the Fund would also invest in money market instruments.

Risks

The Fund is considered lower risk given the exposure to cash and fixed income securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades or defaults can affect the value of fixed income securities.

The target market is conservative investors who want insurance protection with an element of investment exposure in the bond market.

Fund Performance

For the month ended October 2025, the fund outperformed the benchmark by 24bps MoM (month-on-month). The outperformance was due to the outperforming of fixed income securities compared to the benchmark index.

MCIS Life Jati Fund Monthly Report (October 2025)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local Shariah-compliant equities. However, the Fund is not a Shariah-compliant product.

Investment Strategy

The Fund invests primarily in a broad selection of Shariah-compliant equities listed on the Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in Shariah-compliant equity-related Collective Investment Scheme ("CIS") and Shariah-compliant money market instruments.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, reclassification of Shariah status, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of investment exposure in local equity market that complied with Shariah principles.

Fund Performance

For the month ended October 2025, the fund outperformed the benchmark by 15bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

MCIS Life Dividend Fund

Monthly Report (October 2025)

Investment Objective

To achieve a steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in local equities with attractive dividend yield*.

Investment Strategy

The Fund invests primarily in a broad selection of equities listed on Bursa Malaysia that offer consistent dividend payments with attractive yield*. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.

*Potentially higher than market yield

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market with a high yielding income stream.

Fund Performance

For the month ended October 2025, the fund outperformed the benchmark by 46bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

MCIS Life AsiaPac Fund** Monthly Report (October 2025)

Investment Objective

To achieve steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in Principal Islamic Asia Pacific Dynamic Equity Fund ("PIAPDE").

Investment Strategy

This is a feeder fund structure that invests primarily in the PIAPDE. PIAPDE aims to achieve long-term capital appreciation and income while complying with Shariah investment criteria, through investments in the emerging and developed markets of Asia Pacific ex Japan region. PIAPDE's asset can be invested in Shariah-compliant equities, Shariah-compliant warrants, Islamic options, participation in Islamic Collective Investment Scheme which are permitted by Securities Commission Malaysia as well as Sukuk and Islamic Deposits. Besides PIAPDE, the Fund would also invest in Islamic money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, higher price volatility in the emerging markets, and reclassification of Shariah status.

The target market is investor who seek capital appreciation over a long-term investment horizon with a well-diversified portfolio of Shariah-compliant equities in Asia Pacific ex Japan region.

Fund Performance

For the month ended October 2025, the fund underperformed the benchmark by 88bps MoM (month-on-month). The fund has outperformed the benchmark since its inception.

Statement On the Changes in Investment Objectives and Strategies

Effective from April 2025, there were changes to the MCIS Life AsiaPac Fund, mainly as follows: -

- Underlying Fund:** from Principal S&P Asia Pacific Ethical Dividend Exchange Traded Fund to **Principal Islamic Asia Pacific Dynamic Equity Fund**
- Benchmark index:** from S&P Ethical Pan Asia Select Dividend Opportunities Index to **MSCI AC Asia ex-Japan Islamic Index**

*Please refer to the Fund Fact Sheet for further information. (available on our corporate website at www.mcis.my)

MCIS Life Global Yakin Fund

Monthly Report (October 2025)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in abrdn Islamic World Equity Fund ("AIWEF"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in AIWEF (formerly known as Aberdeen Standard Islamic World Equity Fund). AIWEF invests in an international portfolio of Shariah-compliant equities and Shariah-compliant equity related securities of companies with good growth potential. The equities selection will be based on a "bottom-up" approach focused primarily on selecting high quality companies trading at attractive valuations relative to their peers using rigorous business analysis and detailed security valuation analysis. Besides AIWEF, the Fund would also invest in Shariah-compliant money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon and who are willing to accept a high level of risk.

Fund Performance

For the month ended October 2025, the fund underperformed the benchmark by 340bps MoM (month-on-month) mainly due to the underperforming of the underlying fund and the weakening of USD.

MCIS Life Titan Fund Monthly Report (October 2025)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in Eq8 Dow Jones US Titans 50 ETF (Formerly known as MyETF Dow Jones U.S. Titans 50) ("ETF"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in ETF. The ETF is a passive index fund that tracks the Dow Jones Islamic Market U.S. Titans 50 Index ("Index"). The Index is designed as a performance benchmark of 50 largest companies by float-adjusted market capitalisation listed on relevant exchanges which have passed rules-based screens for Shariah compliance. Besides ETF, the Fund would also invest in Shariah-compliant money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who are seeking diversification and investment opportunities in Shariah-compliant equities in the U.S. market and seeking liquid financial instruments with an index tracking feature.

Fund Performance

For the month ended October 2025, the fund underperformed the benchmark by 175bps MoM (month-on-month) mainly due to the underperforming of the underlying fund and the weakening of USD.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Emerging Asia Fund

Monthly Report (October 2025)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years) by investing in the Principal China-India-Indonesia Opportunities Fund ("PCIIO"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in PCIIO. PCIIO primarily invests in equities and equity-related securities of undervalued listed companies that are domiciled in, or have significant operations in, the China, India and Indonesia markets, which offer attractive valuations and medium-term to long-term growth potential. Besides PCIIO, the Fund would also invest in money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, and higher price volatility in the relevant emerging markets.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon with equity investment focuses on China, India and Indonesia.

Fund Performance

For the month ended October 2025, the fund outperformed the benchmark by 164bps MoM (month-on-month), mainly due to the outperformance of the underlying fund.

Equity Market Review and Outlook

Market Review

The Malaysian equity market ended the month of October slightly unchanged with the FBMKLCI Index closed at 1,609.15 points (-0.2% MoM and -2.0% YTD). This was due to the foreign selling of local equities market despite the Fed rate cut. The average daily trading value on Bursa Malaysia rose 8.1% MoM (15.3% YoY) during the month to RM2.9bil, the highest in the last 12 months. Meanwhile, the average daily trading volume on Bursa Malaysia rose 19.0% MoM (+28.2% YoY) to 3.6bil units, the highest since August 2024.

Local institutions stayed net buyers of Malaysian equities for the fifth consecutive month, with net buy flows of RM3.7bil in October 2025, significantly higher compared to RM0.7bil in September 2025. On the other hand, local retail investors stayed net sellers for the second consecutive month, with net sell flows rising 53.6% MoM to RM700mil (RM456mil of net sell in September). Foreign investors returned to being net sellers of Malaysian equities in the month, with net sell flows of RM2.7bil more than wiping out the net buy flows of RM0.1bil in September 2025.

Global equities had a solid performance in the month of October 2025. In the U.S., the S&P 500 Index gained 2.3% MoM and the Dow Jones Industrial Average Index advanced by 2.5% MoM. The European equities market advanced modestly in October, with the MSCI Europe Index registered a gain of 2.4% MoM. The Asia-Pacific ex-Japan regions were showing mixed performances with positive bias. The rally was largely fueled by enthusiasm for AI, which drove a technology-led surge. Positive developments in US-China trade relations further bolstered sentiment, offering relief to export-heavy economies such as South Korea and Taiwan. The MSCI Asia APEX 50 ex-Japan closed higher by 6.0% MoM.

Market Outlook & Strategy

Traditionally, FBMKLCI Index's performance was negative in November, with an average of -0.2% and -0.3% for both MoM returns over the past 10 years and 45 years. We expect the market to be supported by its attractive valuations at current levels of 15.3x PER, as it is now below its 15-year historical average of 16.8x and P/B of 1.47x, below the 15-year historical average of 1.83x.

The FBMKLCI maintained its bullish reversal after breaking above the downtrend line from its August 24 peak, with index trading above most of its moving average lines. It showed resilience after being sideways in July. The MACD remained in bullish territory throughout the month, and the RSI is still comfortably below overbought levels. As the sentiment is shifting in favour of the bulls, we anticipate the index to range between 1,522 points (200-day SMA) as key support and resistance at 1,680 (52-week high).

The Malaysian equity market is poised for positive growth for the remaining months in the year 2025, supported by domestic demand, strong economic fundamentals, and targeted policy reforms. However, risks from slower global growth, trade policy uncertainties, and continued foreign fund outflows are expected to weigh on the local market outlook. With the expectation of higher volatility, we are cautiously optimistic about the outlook for the local equity market.

Fixed Income Review and Outlook

Market Review

Malaysia Government Securities ("MGS") yields ended higher across all tenures, attributed to the strong 3Q2025 GDP growth of +5.2% YoY as well as the positive outcome from the US-Malaysia trade deal. Brent crude oil prices declined to USD65.07/barrel as at end-Oct'25 (end-Sep'25: USD67.02/barrel). Meanwhile, ringgit strengthened against dollar to RM4.189/USD in Oct'25 (Sep'25: RM4.207/USD).

On the local economic data, inflation increased to +1.5% YoY in Sep'25 (Aug'25: +1.3% YoY). The inflation forecast is projected to increase in 2H2025 (2024: +1.8% YoY), potentially driven by the cost-push factors such as the minimum wage hike, electricity tariff review, higher Sales Tax rate, water tariff revisions as well as the uncertainties of US Reciprocal Tariffs.

Malaysia Exports grew by +12.2% YoY in Sep'25 (Aug'25: +1.9% YoY), reflecting the volatile external trade data due to US Reciprocal Tariffs. The faster growth was mainly led by Manufacturing Exports and Agriculture Exports. Besides, both Exports to ASEAN market and US market accelerated to +19.2% YoY and +24.4%YoY respectively (Aug'25: +3.8% YoY and -17.2% YoY respectively). Meantime, Imports rebounded to +7.3% YoY in Sep'25 (Aug'25: -5.9% YoY), reflecting the recovery in Consumption Goods Imports and continued growth in Capital Goods Imports. All in all, the trade surplus widened to +RM19.9bil in Sep'25 (Aug'25: +RM15.9bil).

BNM international reserves improved further to USD123.8bil as at end-Oct'25 (end-Sep'25: USD123.6bil). The reserves position is sufficient to finance 4.8 months of imports of goods and services and is 0.9 times of the total short-term external debt.

The auctions unveiled in Oct'25 is as follow: -

Government Auctions Issue	Issue Date	Auction Amount + PP (RM mil)	Bid-cover (times)	Avg Yield (%)
30-yr Reopening of MGS 07/55	07-Oct-25	5,000.00	1.38	4.02
5-yr Reopening of MGII 08/30	15-Oct-25	5,000.00	2.81	3.22
20-yr Reopening of MGS 05/44 4.180%	22-Oct-25	4,500.00	1.70	3.98

Source: Bank Negara Malaysia

Chart 1: MGS Yield Curve

Source: BPAM

Chart 2: US Treasury Yield Curve

US 10-year Treasury yield declined to 4.08% as at end-Oct'25 (end-Sep'25: 4.15%), in line with the US Fed's rate cut by 25bps in the month, marking the second consecutive cuts in 2025.

Market Outlook & Strategy

In Malaysia, BNM is anticipated to maintain the monetary policy in 4Q2025, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption, Middle East conflict and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.
