The information contained in this material is general information and intended for the use of professional advisers, researchers and trustees. It does not take into account the objectives, financial situation or needs of any person. These factors should be considered before acting on this information.

MCIS receives remuneration such as fees, charges or premiums for the products. Details of these payments including how they are calculated and when and how they are payable can be found in the relevant sales illustrations, or other disclosure document for each product.

Past performance is not a reliable indicator of future performance

The information in this presentation should not be considered a personal recommendation on any of the securities or stocks mentioned.

EXECUTIVE SUMMARY

For the month of October 2017, the FBMKLCI fell 7.6 points or 0.4% m-o-m to close at 1,747. The weaker market was due to outflow of foreign funds of around RM226.3mil during the month. The broader market outperformed the FBMKLCI, with the FBM EMAS gaining 0.5% mom to 12,597pts for the month. Average daily value traded on Bursa in Oct fell 3% m-o-m to RM2.47bn.

October was a tough month for local bond market as Malaysian Government bond prices tumbles across the curve, tracking the higher US Treasury yields. This also resulted in strengthening the Dollar against major currencies, which has seen Ringgit weakened against the Dollar to RM4.23/USD from RM4.22/USD. Brent crude oil price inched higher to US\$61.37/bbl from US\$57.54/bbl due to the extension of output cuts led by OPEC.

Headline inflation in September rose to 4.3% YoY (Aug'17: 3.7% YoY), due to increase in transportation cost (fuel), though core inflation still remains stable at 2.4% YoY in September.

Going forward, we are cautiously positive on the equity market backed by better economic outlook, improving earnings, strengthening of the ringgit and potential election this year. However, short term foreign selling on the market may provide opportunity to accumulate on weakness. For fixed income, we are cautious in taking duration in view of an upward trending yield environment. Despite the local bond market is fuelled by the external risk factors such as geopolitical tension in North Korea, Brexit and fluctuation in crude oil prices, we believe corporate bond space still provides attractive yields given stable monetary stance from BNM and strong fundamentals in local market. As such, we will keep looking to buy on dips of corporate bonds if the opportunity arises.

Based on the performance table below, on monthly basis, Balanced Fund, Dividend Fund, Equity Fund and Income Fund had outperformed their respective benchmarks. Meanwhile other funds had underperformed their benchmarks.

Policyholders are encouraged to focus into regular premium given the current risk and volatile period of the economic and market condition. Risk adverse investors should focus into income fund due to its less volatile as compared to equity related funds.

Performance Table: Funds vs Benchmarks

AsiaPac Fund Monthly Report (October 2017)

Investment Objective

To achieve steady income stream with potential growth in the Asia Pacific Region over medium to long term. The aim of the Fund is to outperform the S&P Ethical Pan Asia Select Dividend Opportunities Index over periods of five or more years.

Investment Strategy

To invest in Asia Pacific Ethical Dividend Exchange Traded Fund (ETF), managed by CIMB Principal Asset Management where the ETF is listed on the Singapore Stock Exchange.

The ETF focuses on top 40 ethical and high yielding stocks in the Asia Pacific Region excluding India, Taiwan, Japan, New Zealand and Philippines. The fund provides country diversification across the industry that is traded in US Dollar.

Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund to be reviewed on regular basis, and adjusted to commensurate with the Investment Team view on the relative attractiveness of each asset class.

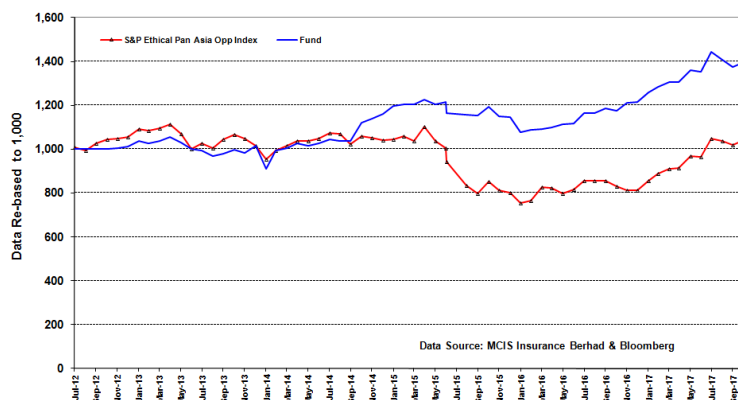

The following factors can potentially affect the value of the Fund; economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The target market is for investors who are seeking regional exposure from investment and at the same time, seeking for medium to long term capital appreciation with moderate market risk.

Fund Performance

For the month ended October 2017, the fund had underperformed the benchmark by 47bps MoM (month on month). This was mainly due to strengthening of ringgit during the period. However for since inception period, the fund had outperformed the benchmark.

Notice: Past performance is not indicative of future performance, and the performance of the Fund is not guaranteed.

The Fund returns are calculated by MCIS and based on the value of the NAV, and for periods greater than 12-months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

* Index is S&P Ethical Pan Asia Select Dividend Opportunities sourced from Bloomberg.

Other Charges: Switching Fee, you are entitled to four free switches per policy year. Additional switches within the same year will be charged at 1% of the value of units switched, subject to a maximum of RM 50; and all taxes, duties and other charges incurred in the purchase, sale, valuation and maintenance of the investments of the Fund.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

Balanced Fund Monthly Report (October 2017)

Investment Objective

The objective of the Balanced Fund is to provide security and income, while maintaining and potentially increasing the value of capital over the medium to long-term, through exposure across a range of asset classes. The Fund aims to outperform the performance benchmark over periods of three or more years.

Investment Strategy

To invest in Malaysian equities and fixed income securities, including government bonds and corporate debt securities. The asset allocation is reviewed on a regular basis, and is adjusted commensurate with our view on the relative attractiveness of each asset class.

Risks

The Fund is considered medium risk given the mixed exposure of equity securities, fixed income and cash. The following factors can potentially affect the value of the Fund; consumer sentiment, financial performance of the underlying companies, industry and economy development, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades of defaults can affect the value of fixed income securities

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended October 2017, the fund had outperformed the benchmark by 27bps MoM (month on month). The outperformance was mainly driven by higher exposure of outperforming securities in the portfolio compared to benchmark.

* The benchmark index is a composite of 50% FBM KLCI Index and 50% of Markit iBoxx ALBI Malaysia TR Index (Since Dec '12). Prior to that, the index used was HSBC Malaysia All Bond Index for the fixed income portion. Benchmark return is calculated on re-based basis. The source is from the subscription of Markit Indices.

Other Charges: Switching Fee, you are entitled to four free switches per policy year. Additional switches within the same year will be charged at 1% of the value of units switched, subject to a maximum of RM 50; and all taxes, duties and other charges incurred in the purchase, sale, valuation and maintenance of the investments of the Fund.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

Dividend Fund Monthly Report (October 2017)

Investment Objective

To achieve steady income stream with potential for capital growth over medium to long term by focusing mostly on high dividend yielding stocks and money market instruments. The aim of the Fund is to outperform the FBM KLCI Index over periods of five or more years.

Investment Strategy

To invest in a broad selection of companies listed on the Malaysian Stock Exchange. Using a relative value methodology, the fund focuses on undervalued stocks relative to fundamental value, with the aim of achieving an income stream, together with some degree of long-term capital gains.

Risks

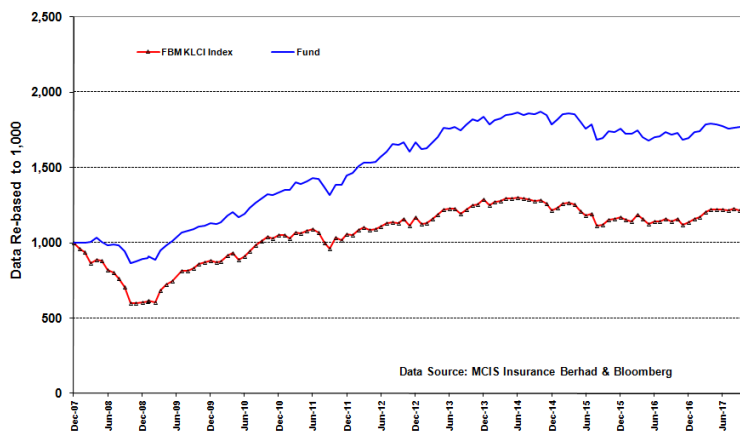

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund; consumer sentiment, financial performance of the underlying companies, the performance of the industry and economy, and the share market in general, social and political factors, and the liquidity of the underlying assets.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended October 2017, the fund had outperformed the benchmark by 32bps MoM (month on month). The outperformance was mainly driven by higher exposure of outperforming stocks in the portfolio compared to benchmark.

Global Yakin Fund

Monthly Report (October 2017)

Investment Objective

The fund aims for capital appreciation in the long term by investing in an international portfolio of Shariah-compliant equities and equity-related securities of companies with good growth potential.

Investment Strategy

The Fund is to feed into Aberdeen Islamic World Equity Fund (AIWEF) which managed by Aberdeen Islamic Asset Management Sdn Bhd. The Fund invests in shariah approved securities across the globe.

The Fund seeks to achieve its objective by investing in an international portfolio of Shariah-compliant equities and equity-related securities of companies with good growth potential. The countries that the Fund will invest in will include, but not limited to Canada, United States of America, United Kingdom, France, Germany, Italy, Netherlands, Sweden, Switzerland, Japan, Australia, China, Hong Kong, Korea, Singapore, Taiwan, Brazil and Mexico.

Risks

The Fund is considered low risk given the exposure to only one underlying securities with no attempt to select stocks individually or to take defensive positions in declining markets. Risk is managed at the management level, where the asset allocation of the fund to be reviewed on regular basis, and adjusted to commensurate with the Investment Team view on the relative attractiveness of each asset class.

The following factors can potentially affect the value of the Fund; economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, and the financial performance of the underlying companies.

The Fund is suitable for investors who seek capital appreciation over a long term investment horizon and who are willing to accept high level of risk.

Fund Performance

For the month ended October 2017, the fund had underperformed the benchmark by 14bps MoM (month on month). The underperformance was mainly due to underperforming of the underlying securities compared to the benchmark index.

Income Fund

Monthly Report (October 2017)

Investment Objective

The objective of the Income Fund is to provide investors with security of income by investing in a mix of fixed income and fixed deposit securities. The aim of the Fund is to outperform the HSBC Malaysia Local Currency All Bond Total Return Index.

Investment Strategy

To invest into underlying asset classes as per the Asset Allocation Ranges. The asset allocation is reviewed on a regular basis, and is adjusted commensurate with our view on the relative attractiveness of each asset class. The Fund invests in cash and fixed income securities including government bonds and corporate debt securities.

Risks

The Fund is considered lower risk given the exposure to cash and fixed income securities. The following factors can potentially affect the value of the Fund; consumer sentiment, financial performance of the underlying companies, the performance of the industry and economy, and the share market in general, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades or defaults can affect the value of fixed income securities.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended October 2017, the fund had outperformed the benchmark by 25bps MoM (month on month). The outperformance was due to outperforming of the fixed income securities compared to the benchmark index.

Jati Fund

Monthly Report (October 2017)

Investment Objective

The Jati Fund is invested in accordance with Shariah principles in Shariah sanctioned equities, money market instruments, and fixed income investments. The aim is to provide security and income, while maintaining and potentially increasing the value of capital over the medium to long-term. The Jati Fund is not a takaful product.

Investment Strategy

To invest in a broad selection of Shariah approved securities listed on the Malaysian Stock Exchange. Using a relative value methodology it looks to buy stocks whose shares appear undervalued relative to fundamental value, with the aim of achieving an income stream, together with some degree of long-term capital gains.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund; consumer sentiment, financial performance of the underlying companies, the performance of the industry and economy, and the share market in general, social and political factors, and the liquidity of the underlying assets.

The target market is clients wanting the surety of insurance protection, with an element of potential upside investment exposure.

Fund Performance

For the month ended October 2017, the fund had underperformed the benchmark by 163bps MoM (month on month). The underperformance was mainly driven by higher exposure of underperforming stocks in the portfolio compared to benchmark.

Equity Market Review and Outlook

Market Review

For the month of October 2017, the FBMKLCI fell 7.6 points or 0.4% m-o-m to close at 1,747. The weaker market was due to outflow of foreign funds of around RM226.3mil during the month. The broader market outperformed the FBMKLCI, with the FBM EMAS gaining 0.5% mom to 12,597pts for the month. Average daily value traded on Bursa in Oct fell 3% m-o-m to RM2.47bn.

On the domestic economic front, Malaysia's industrial activities eased in September, as the Industrial Production Index (IPI) slowed to 4.7% y-o-y in September, from +6.8% in August. The slowdown was broad-based due partly to a shorter working month amid more public holidays in September. Given the strong industrial, services and external activities, Malaysia's real GDP may record a stronger growth in 3Q17, from +5.8% in 2Q.

Globally, the IMF expects global GDP to expand 3.6% in 2017 and 3.7% in 2018, up from prior estimates for 3.5% this year and 3.6% for 2018, driven by a pickup in trade, investment, and consumer confidence. Likewise, growth forecast in the US was raised to 2.2% for 2017 and 2.3% for 2018, from earlier projections of 2.1% in both periods. The IMF also raised its forecast for China's growth to 6.8% this year and 6.5% next year, from 6.7% and 6.4% prior.

Market Outlook & Strategy

Technically, the Head & Shoulders (H&S) pattern continues to take shape for the long term view. This multi-year reversal pattern would only be confirmed on a break below the neckline which is roughly about the 1,680 levels. In October, the index has breached below the neckline of its rectangle pattern or an irregular double top following the move below the 1,750 mark. The next support is at 1,729 followed by the double top measurement target of 1,705.

November has historically been a negative month for the FBMKLCI. We believe the market could be in store for some pullback or consolidation before the typical run-up and window dressing activities in December. Also, November is also a major results season for 3Q17 and there could be some disappointments in the market. This should provide opportunity to accumulate on weakness.

Going forward, we are cautiously positive on the equity market backed by better economic outlook, improving earnings, strengthening of the ringgit and potential election this year. We'll maintain the equity position at the slight high end of the range.

Fixed Income Review and Outlook

Market Review

October was a tough month for local bond market as Malaysian Government bond prices tumbles across the curve, tracking the higher US Treasury yields. This also resulted in strengthening the Dollar against major currencies, which has seen Ringgit weakened against the Dollar to RM4.23/USD from RM4.22/USD. Brent crude oil price inched higher to US\$61.37/bbl from US\$57.54/bbl due to the extension of output cuts led by OPEC.

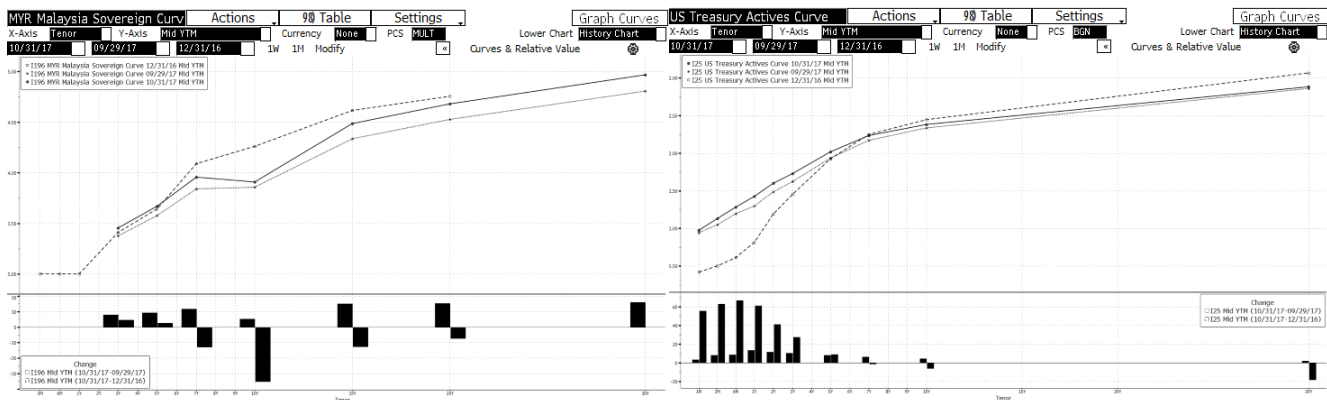

On local economic data, headline inflation in September rose to 4.3% YoY (Aug'17: 3.7% YoY), due to increase in transportation cost (fuel), though core inflation still remains stable at 2.4% YoY in September. Trade surplus widened to RM9.9 billion in August, thanks to the strong double digit growth in both total export (+21.5% YoY) and import (+22.6% YoY). Malaysia foreign reserve continues to grow steadily, with the latest figure at US\$101.4 billion. The reserve is sufficient to retain 7.5 months of imports and 1.1 time short term external debts.

In Eurozone, the European Central Bank decided to cut its QE stimulus program by half to EU\$30 billion a month from January and expected to end in September 2018.

The auctions unveiled in October 2017 are as follows;

Government Auctions				
Issue	Issue Date	Amount (RM million)	Bid-cover (times)	Avg Yield (%)
7-Year Re-issuance of MGS(Mat Sep/24)	6/10/2017	3,000.00	1.60	3.88
20-Year Re-issuance of MGII(Mat Aug/37)	13/10/2017	2,500.00	2.15	4.76
30-Year Re-issuance of MGS(Mat Mar/46)	27/10/2017	2,500.00	1.60	4.96

10-year US Treasury yield tumbled to a low of 2.46% from 2.33% before stabilizing back at 2.38%, taking cue from a potentially more hawkish Federal Reserve due to the new chairman appointment as well as US tax cut expectation before year-end. In addition, some higher-than-expected economic data on new home sales and produced goods has also been supportive for the high Treasury yields.

Market Outlook & Strategy

With major central banks showing signal towards tightening policy, we are cautious in taking duration in view of an upward trending yield environment. Despite the local bond market is fuelled by the external risk factors such as geopolitical tension in North Korea, Brexit and fluctuation in crude oil prices, we believe corporate bond space still provides attractive yields given stable monetary stance from BNM and strong fundamentals in local market. As such, we will keep looking to buy on dips of corporate bonds if the opportunity arises.
