Investment-Linked Fund Performance Report September 2026

General Advice Warning

The information contained in this material is general information and intended for the use of professional advisers, researchers, and trustees. It does not take into account the objectives, financial situation or needs of any person. These factors should be considered before acting on this information.

MCIS receives remuneration such as fees, charges, or premiums for the products. Details of these payments including how they are calculated and when and how they are payable can be found in the relevant sales illustrations, or other disclosure document for each product.

MCIS Life has received, on behalf of the funds, soft commissions from our investment fund bankers/brokers, in the form of research materials and investment-related publications which are incidental to the investment management of the funds. This report, among others, incorporates consolidated content for the benefit of MCIS Life's policyholders.

Past performance is not a reliable indicator of future performance

The information in this presentation should not be considered a personal recommendation on any of the securities or stocks mentioned.

EXECUTIVE SUMMARY

The Malaysian equity market experienced a challenging September, with the FBMKLCI closed at 1,651.17 points (-4.3% MoM). The local market remained vulnerable to external developments, particularly changes in the US monetary policy expectations, global energy prices and foreign investor sentiment. The average daily trading value on Bursa Malaysia softened by 3.3% MoM to RM3.2bil and the average daily trading volume rose 4.0% MoM to 3.8bil shares.

Malaysia Government Securities yields rose across the curve, reflecting a 25bps increase in US Federal Reserve benchmark rate to 3.75%-4.00%, marking its first-rate hike since 2023. Brent crude oil prices increased to USD103.53/barrel as at end-Sep'26, driven by the ongoing geopolitical tension in Middle East region. Meanwhile, ringgit weakened against dollar to RM4.080/USD in Sep'26 (Aug'26: RM4.025/USD).

On the local economic data, Inflation increased to +1.9% YoY in Aug'26, attributable to faster growth in Transport prices. On the other hand, the core inflation eased to +1.7% YoY in Aug'26. Malaysia Exports continued to expand by double-digit growth at +45.5% YoY in Aug'26, mainly driven by the robust Manufacturing Exports and surge in Mining Exports.

Moving forward, the escalation of the US-Iran conflict has increased volatility in global markets, including Malaysia. The FBMKLCI faced mild selling pressure as investors turned cautious amid rising geopolitical risks. However, the impact on Malaysia remains limited due to minimal direct economic exposure to the region. Locally, we continue to be positive on Malaysia's equity market in 2026, supported by strong domestic fundamentals, improving company earnings, and lower external risks. The strengthening in ringgit will also support the domestic market recovery. Any near-term market weakness could be viewed as an opportunity to accumulate equities.

In Malaysia, BNM is anticipated to maintain the monetary policy in 2026, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption as well as Middle East and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.

Based on the table below, on monthly basis, most of the funds outperformed the respective benchmarks, except for MCIS Life Income Fund and MCIS Life Global Yakin Fund.

Policyholders are encouraged to focus on regular premiums given the current risk and volatile period of the economic and market condition. Risk-averse investors should focus on income funds due to its less volatile as compared to equity-related funds.

MCIS Life Balanced Fund
Monthly Report (September 2026)

Investment Objective
To achieve steady stream of income and capital appreciation over the long term (5 to 10 years of period) by investing in a mixture of local fixed income securities and local equities.

Investment Strategy
The Fund invests primarily in local fixed income securities (MYR assets), including government bonds and corporate debt securities, and local equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides fixed income securities and equities, the Fund would also invest in Collective Investment Scheme ("CIS") and money market instruments.

Risks
The Fund is considered medium risk given the mixed exposure of equity securities, fixed income, and cash. The following factors can potentially affect the value of the Fund, consumer sentiment, financial performance of the underlying companies, industry and economic development, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades of defaults can affect the value of fixed income securities.

The target market is conservative investors who want insurance protection with an element of investment exposure in both local equity and bond markets.

Fund Performance
For the month ending September 2026, the fund outperformed the benchmark by 45bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

Notice: Past performance is not indicative of future performance, and the performance of the Fund is not guaranteed.

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12 months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

* The benchmark index is a composite of 50% FBMKLCI Index and 50% of iBoxx ALBI Malaysia Index TR (Since June '16). Prior to that, the index used was HSBC Malaysia All Bond Index for the fixed income portion. Benchmark return is calculated on re-based basis. The source is from the subscription of iBoxx Indices and Bloomberg.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Equity Fund
Monthly Report (September 2026)

Investment Objective
To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local equities.

Investment Strategy
The Fund invests in broad selection of equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.

Risks
The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market.

Fund Performance
For the month ended September 2026, the fund outperformed the benchmark by 141bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

MCIS Life Income Fund
Monthly Report (September 2026)

Investment Objective
To achieve a steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in local fixed income securities.

Investment Strategy
The Fund invests primarily in local fixed income securities (MYR assets), including government bonds and corporate debt securities. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides fixed income securities, the Fund would also invest in money market instruments.

Risks
The Fund is considered lower risk given the exposure to cash and fixed income securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades or defaults can affect the value of fixed income securities.

The target market is conservative investors who want insurance protection with an element of investment exposure in the bond market.

Fund Performance
For the month ended September 2026, the fund underperformed the benchmark by 36bps MoM (month-on-month). The underperformance was due to the underperforming of fixed income securities compared to the benchmark index.

MCIS Life Jati Fund
Monthly Report (September 2026)

Investment Objective
To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local Shariah-compliant equities. However, the Fund is not a Shariah-compliant product.

Investment Strategy
The Fund invests primarily in a broad selection of Shariah-compliant equities listed on the Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in Shariah-compliant equity-related Collective Investment Scheme ("CIS") and Shariah-compliant money market instruments.

Risks
The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, reclassification of Shariah status, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of investment exposure in local equity market that complied with Shariah principles.

Fund Performance
For the month ending September 2026, the fund outperformed the benchmark by 81bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

MCIS Life Dividend Fund
Monthly Report (September 2026)

Investment Objective
To achieve a steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in local equities with attractive dividend yield*.

Investment Strategy
The Fund invests primarily in a broad selection of equities listed on Bursa Malaysia that offer consistent dividend payments with attractive yield*. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.
*Potentially higher than market yield

Risks
The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market with a high yielding income stream.

Fund Performance
For the month ending September 2026, the fund outperformed the benchmark by 121bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark

MCIS Life AsiaPac Fund
Monthly Report (September 2026)

Investment Objective
To achieve steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in Principal Islamic Asia Pacific Dynamic Equity Fund ("PIAPDE").

Investment Strategy
This is a feeder fund structure that invests primarily in the PIAPDE. PIAPDE aims to achieve long-term capital appreciation and income while complying with Shariah investment criteria, through investments in the emerging and developed markets of Asia Pacific ex Japan region. PIAPDE's asset can be invested in Shariah-compliant equities, Shariah-compliant warrants, Islamic options, participation in Islamic Collective Investment Scheme which are permitted by Securities Commission Malaysia as well as Sukuk and Islamic Deposits. Besides PIAPDE, the Fund would also invest in Islamic money market instruments.

Risks
The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, higher price volatility in the emerging markets, and reclassification of Shariah status.

The target market is investor who seek capital appreciation over a long-term investment horizon with a well-diversified portfolio of Shariah-compliant equities in Asia Pacific ex Japan region.

Fund Performance
For the month ended September 2026, the fund outperformed the benchmark by 200bps MoM (month-on-month). On the long term, the fund had outperformed the benchmark since inception.

MCIS Life Global Yakin Fund
Monthly Report (September 2026)

Investment Objective
To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in abrdn Islamic World Equity Fund ("AIWEF"). However, the Fund is not a Shariah-compliant product.

Investment Strategy
This is a feeder fund structure that invests primarily in AIWEF (formerly known as Aberdeen Standard Islamic World Equity Fund). AIWEF invests in an international portfolio of Shariah-compliant equities and Shariah-compliant equity related securities of companies with good growth potential. The equities selection will be based on a "bottom-up" approach focused primarily on selecting high quality companies trading at attractive valuations relative to their peers using rigorous business analysis and detailed security valuation analysis. Besides AIWEF, the Fund would also invest in Shariah-compliant money market instruments.

Risks
The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon and who are willing to accept a high level of risk.

Fund Performance
For the month ended September 2026, the fund underperformed the benchmark by 149bps MoM (month-on-month).

MCIS Life Titan Fund
Monthly Report (September 2026)

Investment Objective
To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in Eq8 Dow Jones US Titans 50 ETF ("ETF"). However, the Fund is not a Shariah-compliant product.

Investment Strategy
This is a feeder fund structure that invests primarily in ETF. The ETF is a passive index fund that tracks the Dow Jones Islamic Market U.S. Titans 50 Index ("Index"). The Index is designed as a performance benchmark of 50 largest companies by float-adjusted market capitalisation listed on relevant exchanges which have passed rules-based screens for Shariah compliance. Besides ETF, the Fund would also invest in Shariah-compliant money market instruments.

Risks
The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who are seeking diversification and investment opportunities in Shariah-compliant equities in the U.S. market and seeking liquid financial instruments with an index tracking feature.

Fund Performance
For the month ended September 2026, the fund outperformed the benchmark by 64bps MoM (month-on-month).

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12 months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

* Index Dow Jones Islamic Market U.S. Titans 50 Index sourced from Bloomberg.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Emerging Asia Fund
Monthly Report (September 2026)

Investment Objective
To achieve capital appreciation over the long-term (5 to 10 years) by investing in the Principal China-India-Indonesia Opportunities Fund ("PCIIO"). However, the Fund is not a Shariah-compliant product.

Investment Strategy
This is a feeder fund structure that invests primarily in PCIIO. PCIIO primarily invests in equities and equity-related securities of undervalued listed companies that are domiciled in, or have significant operations in, the China, India and Indonesia markets, which offer attractive valuations and medium-term to long-term growth potential. Besides PCIIO, the Fund would also invest in money market instruments.

Risks
The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, and higher price volatility in the relevant emerging markets.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon with equity investment focuses on China, India and Indonesia.

Fund Performance
For the month ended September 2026, the fund outperformed the benchmark by 360bps MoM (month-on-month).

Equity Market Review and Outlook

Market Review

The Malaysian equity market experienced a challenging September, with the FBMKLCI declining to close at 1,651.17 points, representing a monthly decrease of 4.3%. The local market remained vulnerable to external developments, particularly changes in the US monetary policy expectations, global energy prices and foreign investor sentiment. The average daily trading value on Bursa Malaysia softened by 3.3% MoM (+20.1% YoY) to RM3.2bil. Meanwhile, the average daily trading volume rose 4.0% MoM (+25.7% YoY) to 3.8bil shares.

In September 2026, local institutions' net buying record has shrinking sharply to RM206mil from RM1.6bil in the preceding month. In contrast, local retail investors stepped up net buying to RM1.4bil from RM375mil in August, the strongest monthly reading since Jan 2025. On the other hand, foreign investors remained net sellers in September 26, albeit at a slower pace, with net outflows narrowing 17.1% MoM to RM1.6bil (Aug 26: RM2.0bil).

Meanwhile, the global equity markets generally weakened in September 2026 as rising government bond yields, higher crude oil prices and renewed inflation concerns weighed on investor sentiment. The MSCI World Index declined by 1.2% in US dollar terms during the month. In the US, Dow Jones Industrial Average Index posted a loss of 4.3% MoM and the S&P 500 Index was down by 0.5% MoM. European equities underperformed their US counterparts in September, with the MSCI Europe Index declining by approximately 2.5%. Asia Pacific equity markets displayed mixed performance in September, with selected technology-oriented markets demonstrating greater resilience than China and Australia. The MSCI Asia APEX 50 ex-Japan Index gained 1.8% MoM.

Market Outlook & Strategy

Traditionally, FBMKLCI Index's performance was mixed in October, with average returns of 0.7% and -0.1% for MoM over the past 10 years and 45 years, respectively. We expect the market to be supported by its attractive valuations at current levels of 14.9x PER, as it is now below its 16-year historical average of 16.7x and P/B of 1.61x, below the 16-year historical average of 1.82x.

Technically, the FBMKLCI remained in a range-bound trend with mildly negative bias. The RSI was around 33, indicating that the market was approaching oversold territory and suggesting scope for short-term technical rebounds. Immediate resistance was identified around 1,670 to 1,700, while support was around 1,650, with 1,640 representing a further downside level. Trading momentum remained subdued, while persistent foreign selling and elevated global bond yields continued to constrain the index's near-term upside.

Globally, the escalation of the US-Iran conflict has increased volatility in global markets, including Malaysia. The FBMKLCI faced mild selling pressure as investors turned cautious amid rising geopolitical risks. However, the impact on Malaysia remains limited due to minimal direct economic exposure to the region. Locally, we continue to be positive on Malaysia's equity market in 2026, supported by strong domestic fundamentals, improving company earnings, and lower external risks, which could lead to higher market valuations. The strengthening in ringgit will also support the domestic market recovery after a volatility recorded in 2025. Any near-term market weakness could be viewed as an opportunity to accumulate equities.

Fixed Income Review and Outlook

Market Review

Malaysia Government Securities ("MGS") yields rose across the curve, reflecting a 25bps increase in US Federal Reserve benchmark rate to 3.75%-4.00%, marking its first-rate hike since 2023. Brent crude oil prices increased to USD103.53/barrel as at end-Sep'26 (end-Aug'26: USD90.49/barrel), driven by the ongoing geopolitical tension in Middle East region. Meanwhile, ringgit weakened against dollar to RM4.080/USD in Sep'26 (Aug'26: RM4.025/USD).

On the local economic data, Inflation increased to +1.9% YoY in Aug'26 (Jul'26: +1.8% YoY), attributable to faster growth in Transport prices (Aug'26: +2.0% YoY; Jul'26: +1.4% YoY). On the other hand, the core inflation eased to +1.7% YoY in Aug'26 (Jul'26: +1.8% YoY). Malaysia Exports continued to expand by double-digit growth at +45.5% YoY in Aug'26 (Jul'26: +38.0% YoY), mainly driven by the robust Manufacturing Exports and surge in Mining Exports. Additionally, Exports to US market spiked to +130.4% YoY (Jul'26: +79.8% YoY), while Exports to ASEAN market growth rose to +40.2% YoY (Jul'26: +28.7% YoY). Meantime, Malaysia Imports growth also increased to +41.1% YoY in Aug'26 (Jul'26: +36.3% YoY), supported by the strong growth in Intermediate Goods Imports and Capital Goods Imports. All in all, the trade surplus expanded to +RM28.1 billion in Aug'26 (Jul'26: +RM22.5 billion).

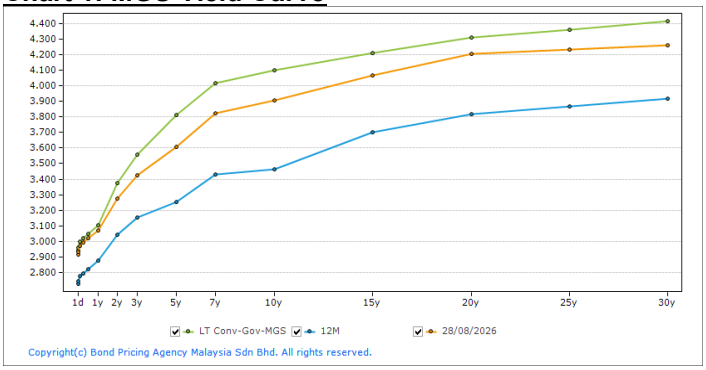
BNM international reserves declined marginally to USD131.8 billion as at end-Sep'26 (end-Aug'26: USD132.0 billion).

The auctions unveiled in Sep'26 is as follow;

Government Auctions				
Issue	Issue Date	Auction Amount + PP (RM million)	Bid-cover (times)	Avg Yield (%)
10-yr Reopening of MGII 7/36 3.447%	10-Sep-26	5,000.00	2.29	4.15
7-yr Reopening of MGS 4/33 3.844%	22-Sep-26	5,000.00	2.17	3.98
30-yr Reopening of MGII 1/56	30-Sep-26	5,000.00	2.01	4.51

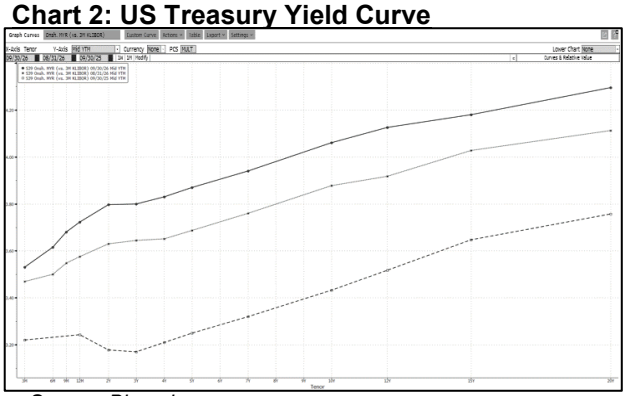
Source: Bank Negara Malaysia

Chart 1: MGS Yield Curve



Source: BPAM

Chart 2: US Treasury Yield Curve



Source: Bloomberg

US 10-year Treasury yield surged to 5.29% as at end-Sep'26 (end-Aug'26: 4.75%), reflecting a 25bps US Federal Reserve rate hike and a hawkish interest rate outlook in the near term.

Market Outlook & Strategy

In Malaysia, BNM is anticipated to maintain the monetary policy in 2026, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption as well as Middle-East and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.
